PART F – SCOPE OF PROPOSED PUBLIC-PRIVATE PARTNERSHIP PROJECT

12. BACKGROUND OF THE PROJECT

The Government of Afghanistan is addressing the lack of hygienic slaughterhouses in Afghanistan and has obtained approximately \$30 million in grant financing from Asian Development Bank (ADB) to finance the development of five (5) slaughterhouses located in Kabul Reshkhoh, Kabul Shakardara, Herat, Mazar and Kunduz. The Government through the Ministry of Agriculture, Irrigation and Livestock (MAIL) in agreement with ADB resolved to finance the construction of the slaughterhouses and outsource business responsibility, operations and maintenance to the private sector.

The business responsibility of the private partners will include sourcing livestock for slaughtering and selling the halal packaged meat products to the following potential buyers: (1) the public, (2) restaurants, (3) supermarkets, (4) government institutions, and (5) export market.

13. SCOPE OF THE PROJECT

The five slaughterhouses are being constructed under a turnkey contract with funding from the \$30 million grant facility. Construction of Kabul Reshkhoh Slaughterhouse is complete and was inaugurated by the President in October 2018. The remaining four (4) are at varying stages of completion with Kabul Shakardara Slaughterhouse scheduled for completion by May 2019, Herat Slaughterhouse and Mazar Slaughterhouse and Kunduz Slaughterhouse by June 2019.

13.1 ASSET DESCRIPTION

Each proposed modular slaughterhouse is designed to have a slaughtering capacity of 100 large ruminants and 500 small ruminants per 8-hour shift, and to operate 26 days per month. It is capable of running 3 shifts per day. Using a modern facility that centralizes livestock slaughtering will facilitate pre and post-mortem inspection and provide higher-quality hides, skins, and intestinal by-products for further processing.

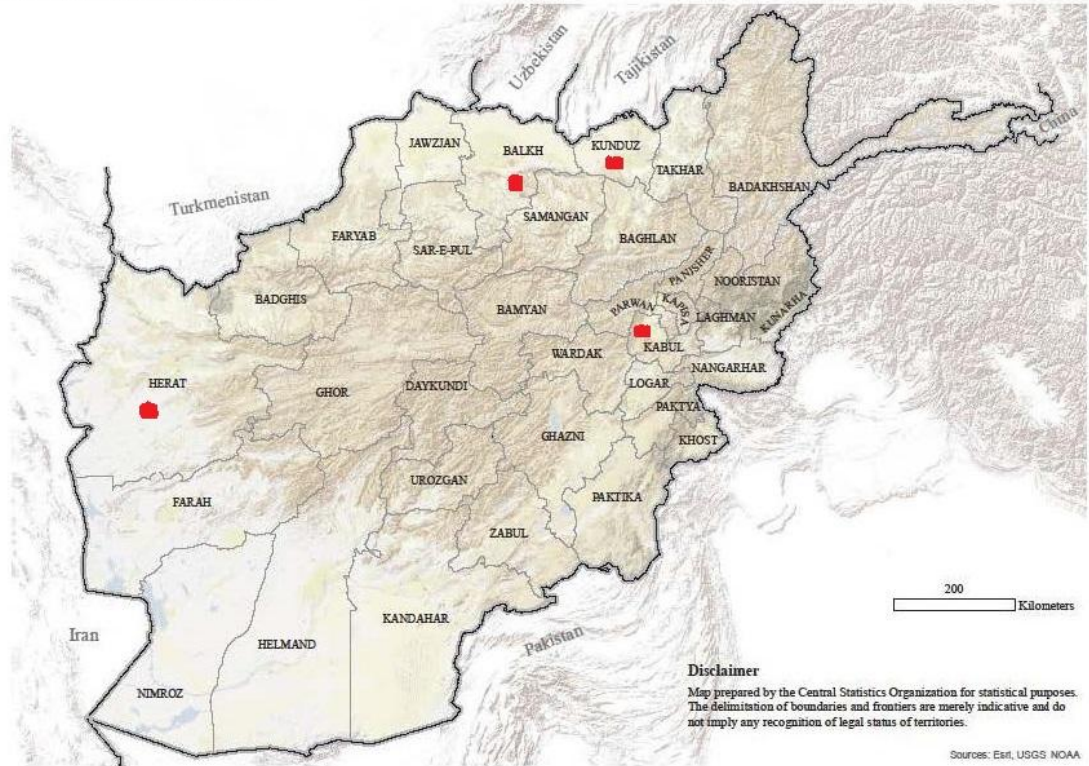

Each slaughterhouse has the following facilities:

- a. Main slaughterhouse building
- b. Livestock pens (Paddock 800m²)
- c. Animal path
- d. Slaughtering area 576 m² (sheep cutting area and cattle cutting area)
- e. The slaughterhouse overhead rail system supported by a dedicated grid of steel columns and beams and fully integrated with the equipment.
- f. By-product area including bone room, liver room, tripe room, skin room and head-foot room (the bone room shall be at controlled temperatures)
- g. Provide cold storage facilities
- h. WWTP with 150 m³ capacity per shift
- i. Separate processing lines for small and for large ruminants
- j. Administration building
- k. Quarantine building
- l. Worker facilities area/building:
- m. Service building including (boiler room, energy storage, workshop, and first aid room)
- n. Equipped laboratory to meet slaughterhouse routine tests requirements including kit for assurance of proper operation of WWTP.
- o. Incinerator (for waste protein material disposal)

- p. Refrigerated and livestock transportation trucks
- q. Two generators, each with 300KVA capacity
- r. Site infrastructure including roads, parking, sidewalks, stormwater collection system, perimeter fence including fence protection and security, guard room, water supply and distribution system, hot water system, sanitary sewer collection and treatment system, electrical system site communications as per site plan including sterilization pool with all accessories, finishing (line and painting), and construction joints with its all lightning system.

13.2 LOCATION

MAP OF AFGHANISTAN

Each slaughterhouse is located on 5 hectares of government owned land for current facilities and for future expansion. Their geographic locations are as follows:

Kabul Reshkhori Slaughterhouse

- Char Asiab District, Gul Bagh Area, Rishkhor
- Located about 14 km away from Kabul city

Kabul Shakardara Slaughterhouse

- Shakar Dara District, Karez-e Mir Area
- Located about 2 km away from the main road connecting Kabul with the north of the country and about 12 km away from Kabul city

Kunduz Slaughterhouse

- Dasht-e Alchin Area
- Located in front of Kunduz Province power sub-station, about 12 km away from Kunduz city

Mazar Slaughterhouse

- Near the road from Mazar to Dasht-e Shor District
- Located about 14 km away from Mazar city

Herat Slaughterhouse

- Adjacent to Herat Islam Qala Road, near the old Herat slaughterhouse
- Located 12 km away from Jami main square of Herat City

13.3 OPERATIONAL PROCEDURE

MAIL will act as Lessor and Regulator for the slaughterhouses and would in conjunction to the Project Companies engage and Independent Consultant (Inspector) to each facility. It is believed that a major role for an integrated meat company business would be better able to sustain hygienic slaughtering in the future.

Slaughter crew will undertake all slaughtering and dressing. MAIL will provide qualified and designated officials to undertake pre and post - slaughter inspection and will observe the operation for to assess for level of hygienic. It is proposed that the facility will operate initially for one shift daily (8 hours), extended operating hours or an increase in the number of shifts will increase throughput potential proportionately during the lease period.

Livestock for slaughter should be presented 24 hours in advance to allow time for resting and inspection prior to slaughter and a collection service for livestock is envisaged. Finished carcasses and edible offal will be delivered to butchers and market using refrigerated vehicles.

Hides and skins will undergo trimming and initial segregation on site. Intestines and casings will be washed and initially graded on site. Organic solid waste will be stored on site prior to disposal. Waste water will be treated through waste water treatment plant with 150m³ capacity per a shift. Treated water can be utilized for irrigation proposes of green area and also for nearby Agri land. The Animal Health Authority will be responsible for veterinary surveillance (Pre and Post-Mortem Inspection).

Carcass

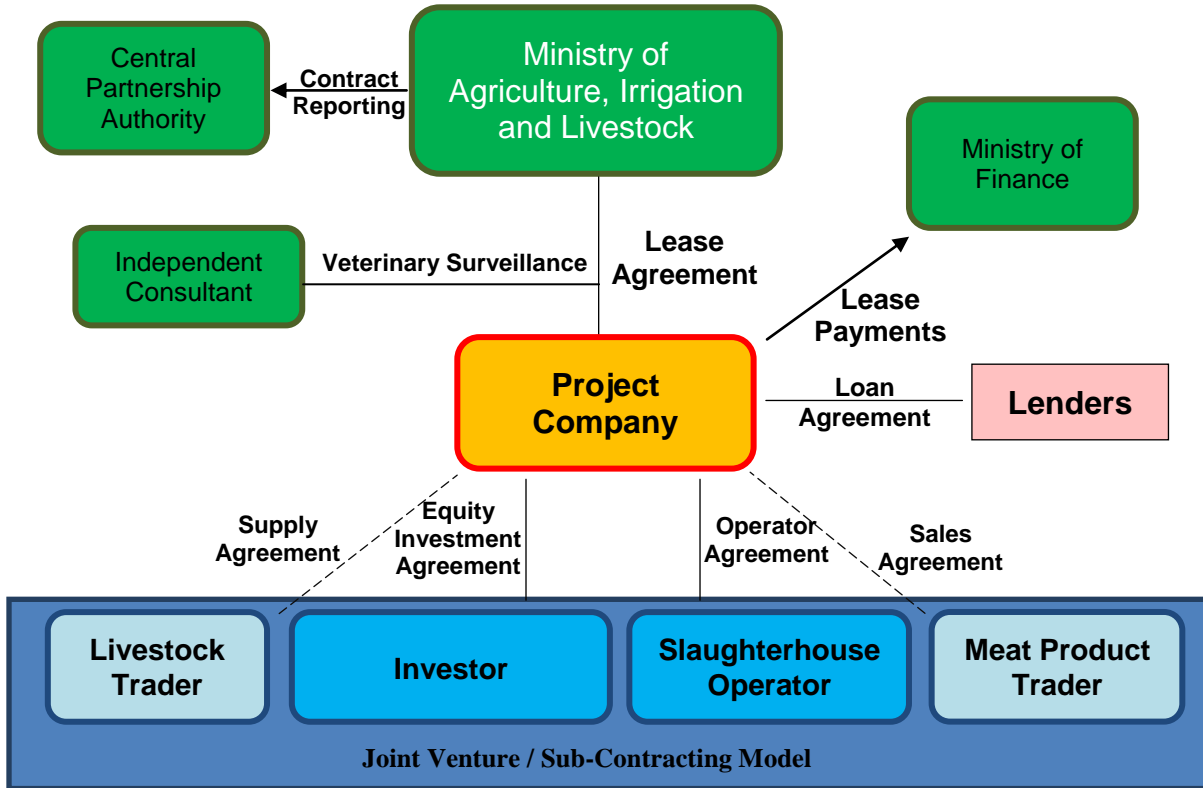

The operator has various options, the carcass may be shipped as a whole to butcher and meat shops, without cutting or deboning in the slaughterhouse, or cut according to standard meat cut, deboned, grinded, labeled and packaged in slaughterhouse. These meat products can be stored up to two weeks in cooler and several months in freezers before they are sold/distributed.

Edible By-Products: Heart, liver, kidney, lungs, brain (optional), feet, stomach, head, spleen, tail, tongue (optional).

The operator also has various options, the byproducts would be cleaned, washed and trimmed, then shipped to the butcher (who bought the corresponding carcass) with no cutting and processing in slaughterhouse. The feet, head and stomach should be prepared according to Standard Operation Procedure. Alternatively, the by-products will be further cut, processed, package and stored preferable in coolers before they are sold/distributed.

13.4 CONTRACT STRUCTURE

The PPP model proposed is government financing of the construction phase and leasing out the completed assets to the private sector over a defined period following which it will be handed back to government. It is proposed that the private partner is responsible for business responsibility, operations and maintenance over a 10-year lease term. The anticipated high-level structure for the relationship between the key project parties is shown below:

The project will be implemented as lease contractual arrangements which are specifically authorized under the Afghanistan PPP Law. Each Slaughterhouse will be a single Lot. Under this contractual arrangement, the Project Company for the Lot will be expected to operate the slaughterhouse on behalf of MAIL pursuant to the terms of the project agreement. It will responsible for sourcing livestock, operating the facility, selling the packaged meat and maximizing the value of the by-products.

Based on the current projections and analysis, MAIL is satisfied that the project is viable, would earn a healthy return for the private sector and generate lease payments for the government. The requirements during the procurement process will take account of market conditions at the time and will be tailored to ensure the best value for all stakeholders. The payment mechanism is subject to further detailed development by MAIL in the period leading up to the commencement of the RFP stage and during the process itself to ensure a clear and measurable link between project outcomes and the way in which the eventual project company is incentivized. MAIL intends to issue a complete draft payment mechanism with the project agreement that will be circulated as part of the RFP documentation.

13.5 FINANCING RESPONSIBILITIES

Each lessee will be required to raise finance by handover date for:

- (i) equity injection into the company for 3 months operating expenses;
- (ii) a spare parts inventory equal to 1% of equipment and machinery;
- (iii) lease security; and
- (iv) commercial insurance for the assets

13.6 POTENTIAL FOR MEAT DISTRIBUTION CONTRACTS WITH GOVERNMENT

There is potential for the Private Operators to enter into long term sales contracts with government ministries and large institutions. MAIL is currently engaging with the government bodies to enable discussions and agreement between the Preferred Bidders (when appointed) and the government bodies.

13.7 HANDBACK OF THE PROJECT

Upon the expiry or early termination of a Project Agreement, the respective Private Operator shall handback the slaughterhouse to the Authority in accordance with defined hand back requirements which will be set out in the PPP Agreement so that the Authority is able to use and operate the respective slaughterhouse following such expiry or termination. There is possibility of extension of the PPP agreement with the Private Operator which in that case the Private Operator would retain the slaughterhouse for a specific period once again.
